Market Currently Served:

United States and Canada

Opportunities:

A race engineering business established in 1995, providing engineering services to the racing industry. There are three aspects to the business:

1. Racing Engineering
2. Non-Racing Engineering, Testing Services, Test Systems
3. Formula SAE products.

KEY FEATURES:

- Developed 7-post testing for one of the Big three Auto Manufacturing companies.
- Company was the race engineers for the first 200 mph front-wheel-drive dragster.
- All software, analysis tools, user interface GUIs, test methods, etc. are developed in-house.
- Non-Racing Engineering, Testing Services, Test Systems. This is a new business area for the company. As in race engineering, company is exploring niche areas of markets where their unique talents and experience can differentiate themselves from competitors.

Real Estate:

3,000 square feet facilities that houses Offices, Design, Development, and Testing Rooms, and Warehouse. Long Term Lease in place.
